

Consolidated Financial Report [IFRS]

For the 6-month period ended September 30, 2015

October 27, 2015

Listed Company: Hitachi Metals, Ltd. (URL <http://www.hitachi-metals.co.jp/e/index.html>)

Listed Stock Exchanges: Tokyo Stock Exchange, Inc. (First Section, Code Number 5486)

Representative: Hideaki Takahashi, President and Chief Executive Officer

Contact: Toshiko Kouno, General Manager, Corporate Communications Dept. Tel: +81-3-5765-4075

Note: Figures are rounded off to the nearest million yen.

1. Performance for the First Half Ended September 30, 2015 (April 1, 2015 to September 30, 2015)

(1) Operating Results (% indicates the rate of +/- compared with the previous fiscal year)

	Revenues		Operating Income		Income before Income Taxes		Net Income		Net Income attributable to Shareholders of the Parent Company		Comprehensive Income	
	Million yen	%	Million yen	%	Million yen	%	Million yen	%	Million yen	%	Million yen	%

1. Qualitative Information Regarding Financial Results for the Six Months Ended September 30, 2015

(1) Information Regarding Operating Results

The global economy during the six months ended September 30, 2015, remained on a modest growth track primarily in advanced countries, while a continued slowdown in emerging economies fueled uncertainty over future economic prospects towards the end of the period. The U.S. economy continued to experience upturns supported by consumer spending, whereas in Asia, the Chinese economy was showing more signs of an accelerated slowdown, and other emerging markets in the region continued to grow at a slow pace. On the other hand, the European market continued its slow recovery as a whole; however, the economies of commodity-exporting countries deteriorated significantly. Amid such situations, while the Japanese economy was generally on a moderate recovery track, some economic indicators appeared to be leveling off temporarily, such as in exports and production affected by the slowdown in emerging economies.

Among the industries in which Hitachi Metals Group (the "Group") operates, the automobile industry experienced a strong demand in the United States; however, the domestic market saw continued inventory adjustments of small cars and demand was weak in China and some emerging countries. Steel production was on a declining path due to the effects of an output cut of small cars and the worsened balance of supply and demand in Asia accompanied by the inventory adjustments. Further, public investment fell, while the Japanese housing construction market recovered. In the electronics industry, demand for smartphones stagnated mainly in China and sales of home electrical appliances decreased due to weaker sales of air-conditioning units following the bad weather.

Under these business circumstances as described above, the conversion of Waupaca Foundry, Inc. into a consolidated wholly owned subsidiary as of November 10, 2014, contributed to the financial results of the Group for the six months ended September 30, 2015. When compared with those for the six months ended September 30, 2014, revenues of the Group increased by 17.0% to ¥524,970 million and operating income increased by ¥21,885 million to ¥61,581 million. Operating income increased mainly due to an increase in gross profit as well as posting gains on business reorganization and others of ¥29,280 million in other income arising from a transfer of shares equivalent to 51% of the issued shares of Hitachi Tool Engineering, Ltd. (currently named Mitsubishi Hitachi Tool Engineering, Ltd.) to Mitsubishi Materials Corporation as of April 1, 2015. For the six months ended September 30, 2015, income before income taxes increased by ¥19,774 million to ¥60,700 million and net income attributable to shareholders of the parent company increased by ¥12,098 million to ¥43,773 million, compared with the same period of the year ended March 31, 2015.

Results by business segment are as follows: Note that revenues for each segment include intersegment revenues and transfers.

High-Grade Metal Products and Materials

Revenues in the High-Grade Metal Products and Materials segment for the six months ended September 30, 2015, were ¥124,343 million, a decrease of 1.3% as compared with those for the six months ended September 30, 2014. Operating income of the segment increased by ¥24,398 million to ¥40,212 million for the same period, partly due to gains on business reorganization and others of ¥25,931 million arising from the transfer of shares in Hitachi Tool Engineering, Ltd. (currently named Mitsubishi Hitachi Tool Engineering, Ltd.) on April 1, 2015.

<Specialty Steel>

While showing a decline in sales of tool steels in China and the Association of Southeast Asian Nations, overall sales remained at the same level as compared with those for the six months ended September 30, 2014, due to a robust demand for automotive mold materials in Japan as well as a further shift towards high-value-added products in product lines. For industrial equipment materials, sales remained unchanged year-on-year, as a result of a steady demand for other industrial components in overseas markets, even with a partial slowdown in demand for automobile-related materials. Sales of alloys for electronic products fell as a whole as compared with those for the six months ended September 30, 2014, due to a decline in demand for semiconductor and other package materials, despite a strong demand for display-related materials for smartphones and tablet devices. Sales of aircraft-related and energy-related materials considerably increased because of a continuing robust demand, as well as reflecting the performance of Hitachi Metals MMC Superalloy, Ltd., which became a consolidated subsidiary of the Group from the second quarter of the fiscal year ended March 31, 2015.

<Rolls>

Sales of rolls showed an increase due to growth in exports during the six months ended September 30, 2015. Sales of injection molding machine parts remained steady year-on-year, thanks to a robust demand for capital investment.

<Amorphous Metals>

Sales of amorphous metals decreased as compared with those for the six months ended September 30, 2014, due to a drop in demand for China, the major market for the products.

Magnetic Materials and Applications

Revenues in the Magnetic Materials and Applications segment for the six months ended September 30, 2015, were ¥62,448 million, a decrease of 8.5% as compared with those for the six months ended September 30, 2014. Operating income of the segment decreased by ¥2,846 million to ¥4,871 million for the same period.

<Magnets>

Sales of rare earth magnets decreased as compared with those for the six months ended September 30, 2014, because of the continuing slowdown in the United States and Japanese demand for hybrid cars and factory automation-related products, despite a strong demand in automotive electronic components including electric power steering, and smartphone-related products for domestic and overseas markets. Sales of ferrite magnets increased due to a solid demand for automotive electronic components and household appliance parts, both in Japanese and overseas markets.

<Soft Magnetic Materials and Applied Products>

Sales of ferrite applied products experienced a decline in demand for solar power generation systems parts. Sales of ferrite core were weak, affected by a slowdown in demand in the Chinese market. Sales of FINEMET[®] diminished due to a decrease in demand for automotive electronic components and the production adjustment of air conditioners.

High-Grade Functional Components and Equipment

Revenues in the High-Grade Functional Components and Equipment segment for the six months ended September 30, 2015, were ¥188,989 million, an increase of 100.8% as compared with those for the six months ended September 30, 2014. Operating income of the segment increased by ¥7,861 million to ¥13,148 million for the same period.

<Casting Components for Automobiles>

An increase in sales of high-grade ductile iron products was due to a favorable demand for automobiles in overseas markets, including the United States, as well as in the domestic market. Sales of heat-resistant exhaust casting components decreased as compared with those for the six months ended September 30, 2014, due to a temporary demand regulation during the first half of the six months ended September 30, 2015. Sales of aluminum wheels increased as compared with those for the six months ended September 30, 2014, supported by a robust demand in both Japanese and U.S. markets. Furthermore, since the operating results of the Group included those of Waupaca Foundry, Inc. starting from November 2014, as a consolidated subsidiary of the Group, this significantly contributed to the overall increase in sales of casting components for automobiles during the six months ended September 30, 2015.

<Piping Components>

Sales of casting iron fittings remained flat as a whole year-on-year, with a decreased demand in the Japanese market offset by an increased demand in overseas markets. Sales of stainless steel and plastic piping components decreased year-on-year as a domestic demand hit a plateau.

Wires, Cables, and Related Products

Revenues in the Wires, Cables, and Related Products segment for the six months ended September 30, 2015, were ¥147,582 million, a decrease of 8.5% as compared with those for the six months ended September 30, 2014. Operating income of the segment decreased by ¥6,344 million to ¥7,345 million for the same period.

<Electric Wires and Cables>

While revenues from electric wires and cables decreased due to review of the Group's business portfolio, sales of electric wires and cables stayed robust backed by a steady demand in wires and cables for rolling stock, which is one of the focused areas of the Group, especially in overseas markets, and an increase in sales of probe cables for medical use. A domestic demand for wires and cables for construction was sluggish.

<Automotive Products>

Sales of automotive products increased as compared with those for the six months ended September 30, 2014, since both electronic components and brake hoses showed a steady increase, supported by a continuing brisk demand for automobiles, especially in North America.

<Information System Devices and Materials>

Sales of information system devices and materials decreased as compared with those for the six months ended September 30, 2014, as a result of a weak demand in network products and wireless systems, due to prolonged sluggish capital investments in infrastructure by telecommunications carriers.

Other

Revenues in the Other segment for the six months ended September 30, 2015, were ¥2,574 million, an increase of 8.3% as compared with those for the six months ended September 30, 2014. Operating income of the segment increased by ¥1 million to ¥151 million for the same period.

(2) Financial Condition

Cash and cash equivalents as of September 30, 2015, were ¥116,381 million, an increase of ¥37,352 million from March 31, 2015, as a result of net cash provided by operating activities and investing activities exceeding the cash used in financing activities.

The analysis for cash flows for each category as of September 30, 2015, is as follows:

<Cash Flows from Operating Activities>

Net cash provided by operating activities was ¥49,749 million, which was mainly attributable to net income of ¥44,079 million for the six months ended September 30, 2015.

<Cash Flows from Investing Activities>

Net cash provided by investing activities was ¥3,206 million, consisting of mainly the following factors: proceeds of ¥27,266 million from sale of investments in securities and other financial assets by transferring shares equivalent to 51% of the issued shares in Hitachi Tool Engineering, Ltd. (currently named Mitsubishi Hitachi Tool Engineering, Ltd.) to Mitsubishi Materials Corporation as of April 1, 2015, proceeds of ¥1,694 million from the transfer of the business, and payment of ¥27,434 million for the purchase of property, plant and equipment.

<Cash Flows from Financing Activities>

Net cash used in financing activities was ¥14,138 million, which was mainly attributable to repayment of long-term debt of ¥6,909 million and payment of dividends of ¥5,750 million to shareholders.

(3) Forecasts for the Fiscal Year Ending March 31, 2016, including Consolidated Operating Forecasts

The operating forecasts for the fiscal year ending March 31, 2016 (April 1, 2015, through March 31, 2016), especially for the latter half of the fiscal year, are expected to be affected by a decreased demand associated with China's prolonged economic slowdown. As the demand adjustments related to domestic automobiles and electronics are also expected to continue for the time being, the Group expects that revenues for the fiscal year will be less than those of the previous forecast.

Earnings are also expected to be below the previous forecasts, reflecting the decline in raw material prices during the six months ended September 30, 2015, in addition to the drop in revenues. In view of these facts, the operating forecasts for the fiscal year ending March 31, 2016, will be revised from the forecasts announced on June 23, 2015.

Consolidated operating forecasts for the twelve months ending March 31, 2016

	Revenues (million yen)	Operating income (million yen)	Income before income taxes (million yen)	Net income attributable to Shareholders of the Parent Company (million yen)	Basic Earnings per Share (yen)

(5) Segment Information

I The primary products and services included in each segment are as follows:

Reportable segment	Major products and services
High-Grade Metal Products and Materials	<ul style="list-style-type: none"> •YSSTM brand high-grade specialty steel products (molds and tool steel, alloys for electronic products [display-related materials and semiconductor and other package materials], materials for industrial equipment [automobile-, aircraft-, and energy-related materials], and razor and blade materials) •Precision cast components •Rolls for steel mills •Injection molding machine parts •Structural ceramic products •Steel-frame joints for construction •Metglas[®] amorphous metals
Magnetic Materials and Applications	<ul style="list-style-type: none"> •Magnets (NEOMAX[®] rare-earth magnets; ferrite magnets; and other magnets and applied products) •Soft magnetic materials (soft ferrite; FINEMET[®] nanocrystalline magnetic material; and Metglas[®] amorphous metals) and applied products •Materials and components for IT devices •Materials and components for medical equipment
High-Grade Functional Components and Equipment	<ul style="list-style-type: none"> •Casting components for automobiles (HNMTM high-grade ductile cast iron products, cast iron products for transportation equipment, and HERCUNITETM heat-resistant exhaust casting components) •SCUBATM aluminum wheels and other aluminum components •Forged components for automobiles •Piping and infrastructure components (GourdTM brand pipe fittings, stainless steel and plastic piping components, water cooling equipment, precision mass flow control devices, and sealed expansion tanks)
Wires, Cables, and Related Products	<ul style="list-style-type: none"> •Electric wires and cables (electric power and industrial systems, electronic and telecommunication materials, electric equipment materials, and industrial rubber products) •Automotive products (electronic components and brake hoses) •Information systems (information networks and wireless systems)

II Last consolidated fiscal year (from April 1 to September 30, 2014)
